Gigabit NAS Features:

NAS Drive is easily set up using the Browser based configuration tool built in.

Media Server (TwonkyMedia): organise your media content (Music/Photos/Movies) and playback via a compatible UPnP media player (MediaStation Pro / Sony PS3) over the network.

iTunes Server – provides alternative storage source for your music files which can be played directly from the NAS drive via iTunes on your PC or laptop

Printer Server – share a printer over the network by connecting the printing into 1 of the USB host ports on the NAS Drive

FTP Server – transfer large files over the internet

BitTorrent Client (Torrent Flux) – securely transfer/share large data files peer to peer via the web based interface.

Set up private folders for individual users.
